

### 3.1.5. Fish-Based Complementary Feeding

#### 3.1.5.2. Fish and Vegetable Canned Food

##### 1) Nutritional value (in 100 g of the product)

Criteria and indices	Measurement Units	Permissible levels		Notes
		standard	marked	
Mass fraction of dry substances	g, not less than	17	-	(as amended by Amendments and Additions No. 18, approved by Resolution No. 71 of Chief State Sanitary Inspector of the RF dated 28.06.2010)
Protein	g	1.5 - 6	+	
Fat	the same	1 - 6	+	
Energy value	kcal	35 - 120	+	
Sodium chloride	g, not more than	0.4	+	
Mineral substances:				
Iron	the same	according to Clause 3.1.5.1	-	
Vitamins:		according to Clause 3.1.5.1		
Starch	g, not more than	3	-	added as a thickening agent
Rice and wheat flour	g, not more than	5	-	the same

## 2) Safety indices

Indices	Permissible levels, mg/kg, not more than	Notes
Toxic elements: Lead Arsenic Cadmium Mercury stannum	0.4 0.2 0.04 0.05 100	for canned food in assembled tin containers
Mycotoxins	according to Clause 3.1.4.3	
Pesticides <*>: hexachlorocyclohexane (alpha-, beta-, gamma isomers)  DDT and its metabolites	0.02  0.01	
Polychlorinated biphenyls	0.2	
Histamine  (as amended by Amendments and Additions No. 2, approved by Resolution No. 41 of Chief State Sanitary Inspector of the RF dated 15.04.2003)	40	tuna, mackerel, salmon, herring
Nitrates	150	for canned food containing vegetables
Nitrosamines	not allowed	< 0.001
Radionuclides: caesium-137 Strontium-90	100 60	Bq/kg the same
Microbiological indicators	Shall satisfy requirements for industrial sterility for canned food of group "A" in accordance with Annex 8 to these Sanitary Rules	
Dioxins  (introduced by Amendments and Additions No. 10, approved by Resolution No. 43 of Chief State Sanitary Inspector of the RF dated 16.07.2008)	not allowed	
Antibiotics <*> (for pond fish and fish of cage culture fishery):		
tetracycline group  (as amended by Amendments No. 24, approved by Resolution No. 79 of Chief State Sanitary Inspector of the RF dated 01.06.2011)	0.01
